

fi-7700 Information Card

This document is intended for partners looking for material to create Fujitsu product pages. In this document, we will tell you where to find pictures, videos, logos, brochures and manuals.

We will also provide you with the basic elements that most of you are using to create product pages, such as a product title, marketing description, technical specifications and what's in the box.

Toolkit

A complete tool kit for these latest models can be found within our Imaging Channel portal, typically this will include company and product logos, literature, imagery of both the static product and lifestyle shots as well as any associated videos, product powerpoints and web banners.

Register or visit now at www.imaging-channel-program.com

Scanner Pictures

A complete Image Library can be found at the following address: www.imaging-channel-program.com

Choose the model you are interested in and the type of shots you are looking for. We recommend the action shots that make the use of the product clearer to the end user.

Scanner Videos

If you are interested in placing a product video tour on your web site, please contact :

Andrew Cowling – andrew.cowling@uk.fujitsu.com - + 44 (0)208 606 4463

Web Content

We are working closely with syndication houses who are hosting a variety of our product content in text form but also rich form (embedded video, imagery and documentation). These companies are Web Collage for English content, CNET for English content and ICECAT for English, German, French, Italian and Dutch content.

If you already work with one of these companies then you need just to load the MPN on to your system and the content will be pulled over, equally if you would like to utilise any of these companies then contact Andrew Cowling at andrew.cowling@uk.fujitsu.com.

Scanner Documentation

All manuals and brochures are located at the following links:

www.fujitsu.com/global/support/computing/peripheral/scanners/manual/
www.imaging-channel-program.com

fi-7700 Information Card

Product Title

Fujitsu fi-7700, Heavy-duty & flexible production scanner for professional use

Top Highlights

- Instant processing performance at 100 ppm / 200 ipm (A4, landscape, colour, 200/300 dpi)
- Mixed batch scanning – A8 to A3 from 20-413 g/m²
- Folded documents up to A1 and longer
- 300 sheet ADF, rotatable ADF and flatbed
- 30,000 document daily duty cycle
- Paper Protect function which protects jam by detecting abnormalities in sound (iSOP: Intelligent Sonic Paper Protection) and document length
- Flexible design and LCD panel for easy operation
- Independent Side Guides for easily aligning mixed size document
- Comes with PaperStream IP (TWAIN/ISIS) and PaperStream Capture; Fujitsu developed scanner driver and Image enhancement plus batch capture software application

Marketing Description

Flexible – durable – high volume scanning

With scanning speeds of 100 ppm/200 ipm (200/300 dpi), the fi-7700 greatly improves process efficiency. Large volumes of information can be captured from various media, including thin paper, plastic cards, envelopes and long page documents.

Smooth paper flow

The fi-7700 automatically adjusts to paper weights from 20-413 g/m². The straight paper path reduces the load on a document and assures reliable scanning regardless of the condition and type of a document. By simply sliding a lever to non-separation mode, you can easily scan thick and long documents folded in half, multi-layered document sets and envelopes.

Innovative paper feeding mechanisms

Skew Reducer automatically handles sheets of paper in a stack individually, so that if one sheet is fed-in skewed, subsequent sheets are not forced into physical skew. This ensures that all information in the documents is captured correctly, even in batches with mixed document formats.

The Paper Protection function monitors document movement and automatically stops feeding when any irregularities are detected.

Form follows function

The fi-7700's ADF unit slides to either side or rotates by 180 degrees. The LCD on the operation panel reveals the scanner status at a glance and enables instant operation.

Lower workload before and after scanning

The Automatic Document Feeder's (ADF) independent side guides move to exactly the position required for each batch. The adjustable stacker side guides support neat alignment of processed documents. The fi-7700 flatbed consecutively scans thick, fragile or bound documents even with the document cover open.

PaperStream IP and PaperStream Capture

The fi-7700 comes bundled with PaperStream IP, an integrated scanner driver and image enhancement module that is built on TWAIN/ISIS standards offering user friendly operability, intuitive high quality image creation and real time processing that will benefit post scan routines like OCR. PaperStream Capture enhances the document capture process from adjusting scanning settings to performing batch scanning, verifying data and releasing to directories, repositories or subsequent process routines. Users can complete data capture tasks easily with the extremely user-friendly graphical user interface (GUI). Moving scanned batches into a queue for later retrieval is possible as well.

fi-7700 Information Card

Service and Support

A one year Advance Exchange is offered as a standard warranty and this includes online support along with parts/labour and shipping costs. Advance Exchange involves the delivery of a refurbished scanner which replaces the faulty scanner.

Service upgrades are available that extends the warranty period to 3 years and additionally offers the possibility for items like onsite service with impressive response and repair times, accidental damage cover and remote desktop support.

Part Numbers

Scanner Model and Options	Part Number
fi-7700	PA03740-B001
Scanner Consumable Kit	CON-3740-002A
Scanner Cleaning Kit	SC-CLE-LV
Extended Warranty	U3-EXTW-LVP
Silver Service Upgrade	U3-SILV-LVP
Gold Service Upgrade	U3-GOLD-LVP
Platinum Service Upgrade	U3-PLAT-LVP

fi-7700 Information Card

Tech Specs

- Scanner type: ADF and flatbed
- Scanning modes: Colour / Greyscale / Monochrome / Automatic Detection
- Image sensor: Colour CCD x 2
- Light source: White LED array x 4
- Optical resolution: 600dpi
- Scanning speed (A4 landscape): 100ppm / 200ipm (200/300 dpi), Flatbed: 0,6 sec. (200/300dpi)
- ADF capacity – 300 sheets
- Document size / Document weight: Min: 50.8 x 69 mm, Max ADF: 304.8 x 431.8 mm / 20 to 413g/m²
Flatbed: 304,8 x 457,2 mm
- Interface: USB 3.1 Gen 1 / USB 3.0 / USB 2.0 / USB 1.1
- Driver: PaperStream IP
- Power requirement: AC 100V to 240V
- Operation environment: Temperature: 5°C to 35°C, Relative humidity: 20 to 80% (non-condensing)
- Power consumption: Operating: 64W or less; Sleep mode: 1.7W or less
- Dimensions (W x D x H): 700 x 500 x 345 mm
- Device weight: 35 kg
- Environmental compliance: ENERGY STAR® compliant / RoHS
- Compatibility – See <http://emea.fujitsu.com/fiscannerfags/> for further information

- Software included (or available for download):
 - PaperStream IP
 - PaperStream Capture
 - Software Operation Panel
 - Error Recovery Guide
 - Scanner Central Admin tools
 - ScanSnap Manager for fi Series
 - Scan to Microsoft SharePoint
 - ABBYY FineReader for ScanSnap
 - 2D barcode for PaperStream

What's in the box

- fi-7700 scanner
- ADF paper chute, Stacker
- Quick Installation Sheet and safety precautions
- AC cable (varies depending on the country)
- AC adapter
- Set up DVD-ROM
- USB cable
